

# Detailed Contents

Preface	xii
About the Authors	xv
<b>PART I: ORIENTATION TO TECHNOLOGY-BASED HEALTH PROMOTION</b>	<b>1</b>
<b>Chapter 1: A Primer on Technology-Based Health Promotion</b>	
Chapter Overview	2
What Is Unique and Beneficial About Technology-Based Health Promotion?	2
Reaching Larger Numbers With Health Promotion Programs—Including Disadvantaged and Marginalized Groups	3
Standardizing Information	8
Tailoring Information	9
Interactivity and Social Media	9
Privacy	10
Autonomy	10
Portability	11
Potentially Lower Program Costs	11
What Are Challenges We Face With Technology-Based Health Promotion?	12
Sampling and Generalizability	12
Identification of Users and Confidentiality	14
Attention Span and Competing for Attention Online and With Mobile Devices	15
Bias and Ongoing Digital Divide	15
Technological Obsolescence	16
The Role of Theory in Technology-Based Health Promotion	18
What Are the Current and Best Practices in Technology-Based Health Promotion?	20
Hybrid Programs—Using Technology to Enhance or Supplement Health Promotion	20
Stand-Alone Interventions for Infectious and Chronic Illness Prevention	24
What Are Emerging and Evolving Trends in Technology-Based Health Promotion?	25
Web 1.0 and Web 2.0 and Social Networking	25
Portability	28

Summary	28
Concluding Questions	29
Chapter Exercise	29
Additional Resources	30
References	30
<b>Chapter 2: Ethical Issues in Technology-Based Health Promotion</b>	<b>35</b>
Chapter Overview	35
What Are Unique and Beneficial Ethical Considerations for Technology-Based Health Promotion?	35
Beneficence	35
Transparency	36
Equity	36
Confidentiality	37
Working With Special Populations	38
What Are Ethical Challenges We Face With Technology-Based Health Promotion?	38
Beneficence	38
Transparency	39
Equity	40
Confidentiality	40
Working With Special Populations	41
What Are the Current and Best Ethical Practices in Technology-Based Health Promotion?	43
Working With IRBs	43
Using Technology to Improve the Informed Consent Process	44
Security and Issues of Program Data Protection	46
What Are Emerging and Evolving Ethical Trends in Technology-Based Health Promotion?	49
GIS and Tracking of Individuals	49
Data Sharing Across Agencies	50
Summary	50
Concluding Questions	52
Chapter Exercise	52
Additional Resources	53
References	54
<b>PART II: UNIQUE ASPECTS OF TECHNOLOGY-BASED PROGRAM DEVELOPMENT, IMPLEMENTATION, AND EVALUATION</b>	<b>57</b>
<b>Chapter 3: Technology-Based Health Program Development</b>	<b>58</b>
Chapter Overview	58
What Are Unique and Beneficial Considerations for Each Type of Technological Modality?	59

The CD-ROM/DVD	59
The Computer Kiosk	59
The Internet	60
Mobile Phones and Other Portable Devices	60
What Are Challenges We Face With Each Type of Technological Modality?	60
Challenges With Using Each Type of Modality	61
Challenges in Technological Obsolescence	62
Making Content Available Beyond the Life of an Evaluation	65
What Are the Current and Best Practices in Technology-Based Program Development?	66
Be as Informed as Possible About Expectations of Your Audience	66
Make Sure Your Program Works in the Manner You Intended	66
Development of Program Databases and Tailoring Algorithms	68
Teamwork—The Information Technologist, Creative Developer, Health Promoter, and Evaluator—and Their Diverse and Varied Skill Sets	71
Partnerships for Technology-Based Health Promotion	74
Know Your Population and What Modality It Uses	75
Developing Your Program Content: Some Examples	78
What Are Emerging Trends in Technology-Based Program Development?	78
Very Brief, Focused, and Targeted Interventions	80
“Blended” Programs That Utilize Multiple Technological Modalities Within One Program	80
“Hybrid” Programs That Utilize Technology to Enhance or Extend Face-to-Face Programs	80
Use of Geographic Information Systems (GIS) in Program Planning	81
Summary	82
Concluding Questions	83
Chapter Exercise	84
Additional Resources	84
References	86
<b>Chapter 4: Technology-Based Program Implementation</b>	<b>89</b>
Chapter Overview	89
What Are Unique and Beneficial Considerations for Technology-Based Program Implementation?	90
Recruitment of Large Numbers of Program Participants	90
Delivery of Standardized Content	90
Ease of Adoption for Implementation in Diverse Settings	90
What Are Challenges We Face With Technology-Based Program Implementation?	91
Sampling and Generalizability of Samples Recruited in Virtual Settings	91
Management of Large Numbers of Participants Enrolling Simultaneously	91
Retention of Program Participants	92

What Are the Current and Best Practices in Technology-Based Program Implementation?	92
Use of an Infomediary to Orient Potential Program Participants	92
Recruiting the Most Appropriate Audience to Maximize Program Reach	95
Care and Support of Participants During Program Implementation	101
What Are Emerging Trends in Technology-Based Program Implementation?	105
Venue-Based Sampling	105
Recruitment Using Respondent-Driven Sampling	106
Recruitment of and Communication With Participants Using “FriendBlaster” on Social Networking Sites	108
Use of Geographic Information Systems (GIS) to Facilitate Program Delivery	109
Summary	111
Concluding Questions	113
Chapter Exercise	114
Additional Resources	114
References	115
<b>Chapter 5: Program Evaluation for Technology-Based Health Promotion</b>	<b>118</b>
Chapter Overview	118
What Are Unique and Beneficial Considerations for Technology-Based Program Evaluation?	119
Design of Your Evaluation	119
Automated Data Collection, Transfer, and Storage	120
Data Management, Security, and Participant Confidentiality	122
Advances in Statistical Analyses	124
Dissemination of Findings Using Technology	126
What Are Challenges We Face With Technology-Based Program Evaluation?	129
Conducting Evaluation and Technological Obsolescence	129
Retention of Program Participants	129
What Are the Current and Best Practices in Technology-Based Program Evaluation?	130
Utilizing Online Surveys	130
Utilizing ACASI	130
Managing Rapidly Accruing Participants	140
Maximizing Participant Retention	144
What Are Emerging Trends in Technology-Based Program Evaluation?	148
Use of Geographic Information Systems (GIS)	148
Analysis of Programs on Social Networking Sites Online	151
Summary	152
Concluding Questions	156
Chapter Exercise	156
Additional Resources	157
References	159

<b>Chapter 6: Case Studies in Computer-Based Health Promotion</b>	<b>162</b>
Chapter Overview	162
Case Studies of LUCHAR and Project LIGHT	162
Case Study: The LUCHAR Program	162
Case Study: A Computerized Version of Project LIGHT	167
Unique and Beneficial Aspects of LUCHAR and Project LIGHT	174
Considerations for Program Location	176
Data Storage and Transfer	178
What Are Emerging Trends in Computer-Based Health Promotion?	179
Newer Kiosks, Portable Notepads	179
Summary	180
Concluding Questions	181
Chapter Exercise	181
Additional Resources	182
References	182
<b>Chapter 7: Case Studies in Internet-Based Health Promotion</b>	<b>184</b>
Chapter Overview	184
Case Studies of WRAPP and D-Net	184
Case Study: The Wyoming Rural AIDS Prevention Project (WRAPP)	184
Case Study: Diabetes-Network Internet-Based Physical Activity Intervention (D-Net)	189
Unique and Beneficial Aspects of the WRAPP and D-Net Programs	190
Access in Rural Settings	190
Access to Elderly and Naïve Users	190
Challenges in WRAPP and D-Net and Other Internet-Based Health Promotion Programs	191
Considering If the Internet Is the <i>Best</i> Technological Modality for Your Population	191
Participant Retention and Dropout	191
Sustainability Without Incentives	192
Best Practices Employed in Internet-Based Programs	192
Participant Retention	192
What Are Emerging Trends in Internet-Based Health Promotion?	194
Efforts to Meet People Where They Are Online	194
Summary	200
Concluding Questions	201
Chapter Exercise	201
Additional Resources	202
References	203
<b>Chapter 8: Case Studies in Mobile Phone-Based Health Promotion</b>	<b>205</b>
Chapter Overview	205
Case Studies of STOMP and EpiSurveyor	206

Case Study: STop Smoking Over Mobile Phone—The STOMP Program	206
Case Study: EpiSurveyor—Expanding Program Evaluation and Delivery Through Handheld Computers	207
Challenges in STOMP and EpiSurveyor and Other Mobile Phone-Based Programs	211
Limited Opportunities for In-Depth Programs	211
Limited Access to Advanced Features of the Mobile Device	213
Device Sharing and Associated Lack of Confidentiality	213
Best Practices Employed in STOMP and EpiSurveyor and Other Mobile Phone-Based Programs	213
Reaching Audiences With Mobile Devices	213
Constant Access and “Always On” Features of the Mobile Device	216
What Are Emerging Trends in Mobile Phone-Based Health Promotion?	217
Efforts to Incorporate Streaming Video and Other Smart Phone Applications	217
Linking Phones to Face-to-Face Clinic-Based Services	218
Summary	218
Concluding Questions	219
Chapter Exercise	220
Additional Resources	220
References	221
<b>Epilogue</b>	<b>223</b>
Overview	223
Review of the Unique and Beneficial Elements of All Technology-Based Health Promotion Programs	223
Review of the Challenges of Technology-Based Health Promotion Programs	225
Review of the Emerging Trends and Future Directions in Technology-Based Health Promotion Programs	227
Gathering Information Online	227
Virtual Experiences	228
Telemedicine	230
Hybrid Programs—Technology as an Adjunct to Clinical and Community Health Promotion	230
Systems-Level Efforts—Using Technology to Improve Care Delivery at the Provider and Systems Level	231
Concluding Thoughts	231
Technology as Adjunctive and Hybrid	231
Use of Theory	232
References	232
<b>Appendix: Technology-Based Health Promotions</b>	<b>235</b>
<b>Author Index</b>	<b>266</b>
<b>Subject Index</b>	<b>273</b>
